

Mohammed Niyaf S M

Full Stack Developer

☎ 6363606107 | ✉ mohammedniyafsm@gmail.com | 🌐 niyaf.xyz | [in LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Self-driven full-stack developer working with the MERN stack, with a strong interest in understanding how applications scale and behave as systems. Comfortable working across frontend and backend layers, including APIs, real-time communication patterns, and application structure. Shows consistent curiosity toward building scalable and distributed systems, cloud computing, networking, and security considerations. Cares deeply about problem solving and writing code that is readable, maintainable, and easy to reason about.

SKILLS

Languages : JavaScript, TypeScript, HTML, CSS, Java.

Frontend : React.js, Next.js, Tailwind CSS, Redux, OAuth.

Backend : Node.js, Express.js, WebSockets, WebRTC, Pub/Sub, Multer.

Databases & Caching : MongoDB, PostgreSQL, Prisma ORM, Redis.

Cloud & DevOps : Docker, AWS (EC2, S3), CI/CD, NGINX, CDN, Cloudinary.

Tools : Git, GitHub, Postman, Linux, Figma.

Soft Skills : Communication, TeamWork, Time Management, Problem Solving.

PROJECTS

Townify (2D Virtual Office Platform) | Ongoing | GitHub

- Browser-based 2D virtual office enabling remote teams to collaborate in shared spaces using avatars, real-time chat, and video communication.
- Implemented real-time presence, movement, and room interactions using WebSockets.
- Built chat, notifications, and role-based room workflows.
- Integrated WebRTC video communication via LiveKit.
- Used Redis for Pub/Sub notifications and caching.
- **Tech Stack:** TypeScript, Node.js, Express, WebSockets, Redis, Prisma, PostgreSQL, Zod, Google OAuth, Nodemailer, LiveKit, React, Redux, Tailwind CSS

Nuvee Perfumes (Full-Stack E-commerce Platform) | Live | GitHub

- Developed a full-stack e-commerce platform for perfumes with product listings, wishlist, cart, and complete order lifecycle management.
- Integrated Razorpay for secure payments with order cancellation, returns, and automated status updates.
- Implemented OTP-based authentication flows and end-to-end form validation using Zod.
- Built an admin dashboard for managing products, users, orders, coupons, and sales analytics.
- Optimized media handling using Amazon S3 signed URLs and CloudFront CDN for faster global delivery.
- **Tech Stack:** TypeScript, React, Redux Toolkit, Tailwind CSS, Node.js, Express, MongoDB, Zod, Razorpay, Nodemailer, AWS S3, EC2, CloudFront

Echo-Space (Event & Feedback Platform) | Live | GitHub

- Built a full-stack event and feedback platform enabling organization members to share ideas, feedback, likes, and comments through authenticated access.
- Implemented anonymous and non-anonymous posting to support open and privacy-aware communication.
- Developed event listings, interactive comment threads, and full CRUD workflows for user-generated content.
- Designed protected routes and authorization rules using Prisma and GitHub OAuth, with a responsive UI built using shadcn/ui.

Hush-Hub (Real-Time Collaboration Platform) | Live | GitHub

- Built a real-time collaboration platform where users can create or join rooms using unique codes for instant messaging and interaction.
- Implemented WebSocket-based real-time messaging to synchronize user actions across rooms.
- Designed a responsive interface using Next.js and Tailwind CSS.
- Developed backend services for room management and user sessions using Node.js and Express.
- **Tech Stack:** Next.js, TypeScript, Node.js, Express.js, WebSockets, Tailwind CSS

EXPERIENCE

Bridgeon Solutions

MERN Stack Developer Intern

Aug 2025 – Present

- Worked in a structured, full-time engineering environment designed to mirror real industry workflows and expectations.
- Part of a structured developer training bootcamp focused on real-world application development and professional engineering practices.
- Gained hands-on experience with React, Redux Toolkit, Node.js, Express.js, MongoDB, PostgreSQL, Prisma, Next.js, and REST API development.
- Built full-stack features, debugged issues, wrote reusable components, and improved backend API performance.
- Collaborated using Git and GitHub, participated in code reviews, and followed agile workflows including scrum planning and weekly reviews.
- Learned fundamentals of deployment, schema design, authentication workflows, and modern development best practices.

EDUCATION

Yenepoya University

2022 – 2025

Bachelor of Computer Application

CGPA: 8.64

ACHIEVEMENTS

- 3rd Place IBM ICE Day Hackathon (April 5, 2024): Developed an IoT-based project and ranked among top teams, demonstrating strong problem-solving and practical implementation skills.
