

Mohammed Niyaf S M

Fullstack Developer

📞 6363606107 | ✉️ mohammedniyafsm@gmail.com | 🌐 niyaf.xyz | [in LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Self-driven full-stack developer working with the MERN stack, with a strong interest in understanding how applications scale and behave as systems. Comfortable working across frontend and backend layers, including APIs, real-time communication patterns, and application structure. Shows consistent curiosity toward building scalable and distributed systems, cloud computing, networking, and security considerations. Cares deeply about problem solving and writing code that is readable, maintainable, and easy to reason about.

SKILLS

Languages : JavaScript, TypeScript, HTML, CSS, Java.

Frontend : React.js, Next.js, Tailwind CSS, Redux, OAuth.

Backend : Node.js, Express.js, WebSockets, WebRTC, Pub/Sub, Multer.

Databases & Caching : MongoDB, PostgreSQL, Prisma ORM, Redis.

Cloud & DevOps : Docker, AWS (EC2, S3), CI/CD, NGINX, CDN, Cloudinary.

Tools : Git, GitHub, Postman, Linux, Figma.

Soft Skills : Communication, TeamWork, Time Management, Problem Solving.

PROJECTS

Townify (2D Virtual Office Platform) | Live | GitHub

- Developing a real-time 2D virtual environment platform inspired by Gather Town with room-based interactions.
- Implemented real-time user synchronization and presence using WebSocket.
- Built interactive 2D environments with Phaser.js and Tiled maps, including collision detection and tile-based navigation.
- Integrated WebRTC for room-based audio/video communication between users.
- Implemented Redis Pub/Sub to publish and subscribe to space events, delivering real-time WebSocket notifications for join requests, approvals, and access changes.
- Implemented Redis Pub/Sub to publish and subscribe to space events, delivering real-time WebSocket notifications for join requests, approvals, and access changes.
- Structured as a monorepo using Turborepo for shared packages, consistent tooling, and scalable code organization.
- **Tech Stack:** TypeScript, Node.js, Express, WebSockets, Redis, Prisma, PostgreSQL, Zod, Google OAuth, Nodemailer, LiveKit, React, Redux, Tailwind CSS

Nuvee Perfumes (Full-Stack E-commerce Platform) | Live | GitHub

- Developed a full-stack e-commerce platform for perfumes with product listings, wishlist, cart, and complete order lifecycle management.
- Integrated Razorpay for secure payments with order cancellation, returns, and automated status updates.
- Implemented OTP-based authentication flows and end-to-end form validation using Zod.
- Built an admin dashboard for managing products, users, orders, coupons, and sales analytics.
- Optimized media handling using Amazon S3 signed URLs and CloudFront CDN for faster global delivery.
- **Tech Stack:** TypeScript, React, Redux Toolkit, Tailwind CSS, Node.js, Express, MongoDB, Zod, Razorpay, Nodemailer, AWS S3, EC2, CloudFront

Echo-Space (Event & Feedback Platform) | Live | GitHub

- Built a full-stack event and feedback platform enabling organization members to share ideas, feedback, likes, and comments through authenticated access.
- Implemented anonymous and non-anonymous posting to support open and privacy-aware communication.
- Developed event listings, interactive comment threads, and full CRUD workflows for user-generated content.

Hush-Hub (Real-Time Collaboration Platform) | Live | GitHub

- Built a real-time collaboration platform where users can create or join rooms using unique codes for instant messaging and interaction.
- Implemented WebSocket-based real-time messaging to synchronize user actions across rooms.
- Developed backend services for room management and user sessions using Node.js and Express.
- **Tech Stack:** Next.js, TypeScript, Node.js, Express.js, WebSockets, Tailwind CSS

EXPERIENCE

Tvara

Full Stack Developer (Next.js, Node.js, PostgreSQL)

Feb 2026 – May 2026

- Working on **Tvara**, an AI-driven sales engine that centralizes fragmented sales data across CRMs, emails, and communication platforms.
- Built backend systems for **webhooks and event-driven workflows**, enabling real-time data synchronization and external integrations.
- Implemented **OAuth-based authentication and secure user onboarding**, including company registration, account setup, and organization management workflows.
- Integrated third-party CRM systems such as **Zoho CRM** to sync leads, contacts, and sales activities, ensuring data consistency across systems.
- Collaborated in a production-level environment following clean architecture, version control, and deployment best practices.

Bridgeon Solutions

MERN Stack Developer Intern

Aug 2025 – Feb 2026

- Worked in a structured full-time engineering environment simulating real-world development workflows and expectations.
- Built and contributed to full-stack applications using React, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL.
- Developed REST APIs, implemented authentication flows, and handled state management using Redux Toolkit.
- Gained hands-on experience in system design fundamentals, clean code practices, and scalable application architecture.

EDUCATION

Yenepoya University

2022 – 2025

Bachelor of Computer Application

CGPA: 8.64

ACHIEVEMENTS

- 3rd Place IBM ICE Day Hackathon (April 5, 2024): Developed an IoT-based project and ranked among top teams, demonstrating strong problem-solving and practical implementation skills.
